• Any microphone to get beyond ear buds or no buds

( I am using the cheap DeWise because it works with phone and computer but for ZOOM it needs an adapter to make it a USB microphone )

The question to answer is whether to run audio through your camera or go straight USB

Audio connected to your camera will run down the HDMI line
• “Video Capture” is the generic name for HDMI to USB
  Carries video AND audio

Mirabox Capture Card, 4K
30FPS, HD 1080P 60FPS, USB3.0
HDMI Game Video Capture Card with Mic Input and HDMI Passthrough - Compatible with Windows, Linux, macOS, OBS Streaming for PS3, PS4, Xbox Wii U

• A couple other adapters I use

Anker USB C Hub
[Upgraded], 5-in-1 USB C Adapter with 4K USB C to HDMI, Ethernet Port, 3 USB 3.0 Ports, for MacBook Pro, iPad Pro, XPS, Pixelbook, and More

Official GoPro product. Works with my Hero 7 Black.

I do like this one. 3 USB in and more.
• SUMMARY

Short of just using all your pro cameras, lighting, and mics along with video capture devices, some of these suggestions will get you a higher quality Zoom look.

With the three various HDMI to USB capture adapters I have, I run two cameras and a computer. Zoom is very friendly for swapping out inputs, both camera and audio. And, you can stay with one audio and change to any video input.

Good luck,
SD Media Pros
